

We Have to Eat

Jess Hunt
May 14, 2026

Project Plan

Developer: Jess Hunt

Title: We Have to Eat

Target Audience: People who cook, but are tired of cooking the same thing; Parents, students, couples who have trouble deciding on a meal. Anyone who wanted to try that new side from trader joes, but hates wasting food and money.

Main features:

- Entrée collection: I plan to put each main recipe on it's own page, minimum of 5. Photos of finished dish and uncommon instructions (e.i. cut them lengthwise)
- Sides: as these are simpler recipes I might have them all listed on one page with links to recommended main pairings.
- Ready-made favorites-: which stores/ brands have a side that is worth your money and saves you time, links to stores in the Seattle area with these items.
- Desserts: I plan to have 3+ desserts, each recipe on it's own page, with dairy-free substitutions. Photos of completed desserts.

Personality: Clean and inviting. Cozy and simple like the meals for the home-cook who is out of steam. Want to cook something impressive that doesn't steal your whole day away? Southern inspired recipes that aren't butter heavy, but still might have some butter.

Accessibility Factors:

As I plan to link these recipes to my mother when she requests a copy of my meal idea, I plan to keep it simple and easy to read. I plan to include features that will interpret well to screen readers through ordered lists. While a photo or two will be present, I intend to keep them based on the recipes and there to provide references if something might be confusing. They will include a verbal description for screen readers. It's most likely that users will be on mobile as they access recipes from the grocery store or kitchen.

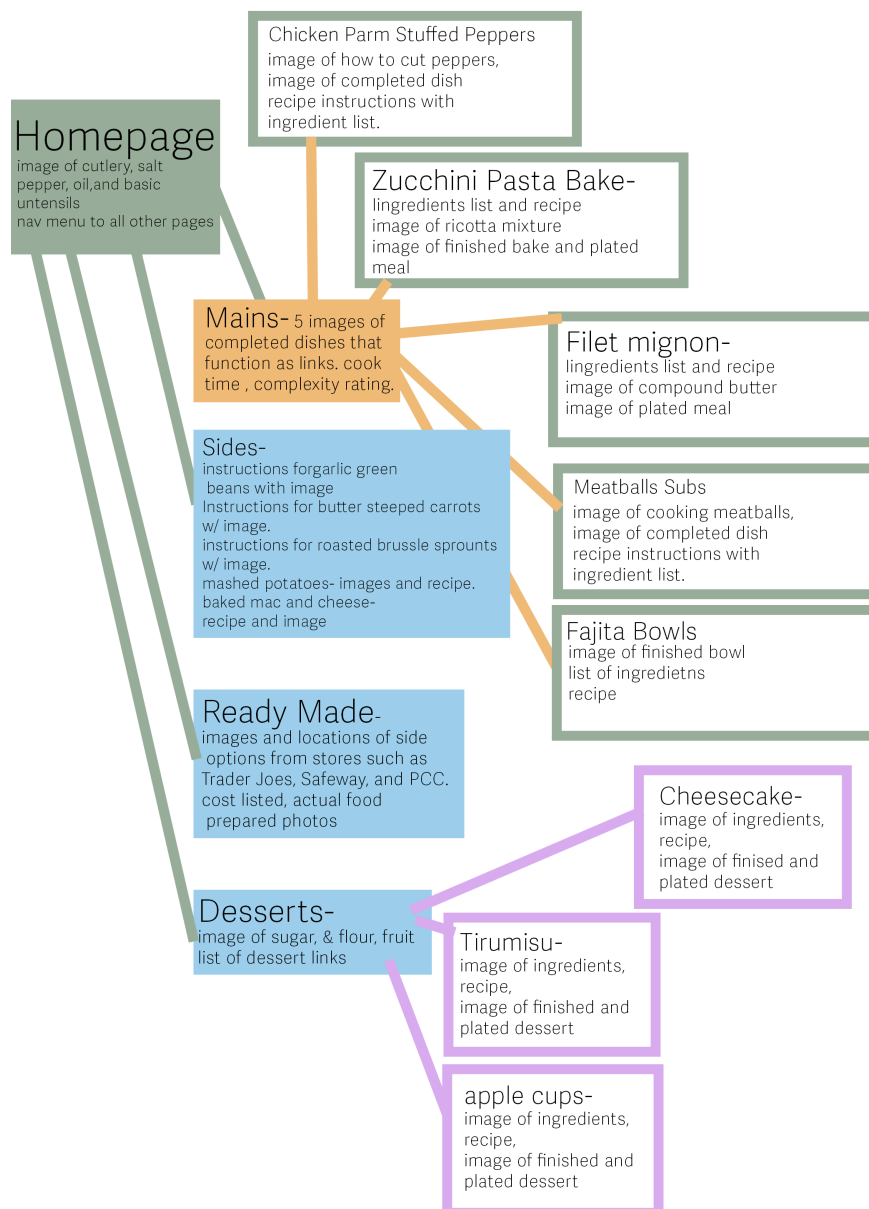

Development Guide

Navigation Elements

Navigation will be under header, center oriented

Text and Pictures- Some text will link to main sections' pages

Navigation Diagram

Development Guide

Site Structure

This is a site with a collection of my favorite recipes to keep them all in one place for ease of sharing.

Directory Structure

Root Directory-contains the following

Directories

images- all jpgs and gifs
styles-stylesheets for all pages
mains- contains entree pages
desserts- contains desserts pages

files:

index.html- homepage for site introduction and overview
mains.html- parent directory for entree recipes with introduction
 stuffedpepper.html- recipe and instructions for stuffed peppers
 filetmignon.html- recipe, instructions, and photos of filet recipe
 zucchini.html- recipe, instructions, and photos of zucchini past bake
 fajitabowls.html- recipe, instructions, and photos of fajita bowls
 subs.html- meatball sub recipe and photos
sides.html- page with side recipes and photos, all on one.
desserts.html- directory to the different dessert recipes
 tiramisu.html- recipe and images
 cheesecake.html- cheesecake recipe and images
 apple.html- apple cups recipe and images
readymade.html- list and images of approved readymade meals and sides
